

Conveyors International – Schierholz Partnership

Conveyors International, one of the UK's leading Overhead Chain Conveyor specialists, have formed a partnership with Schierholz, the well known German Chain Conveyor Systems manufacturer.

The agreement enables Conveyors International to project the full range of Schierholz systems in the UK, which are capable of accommodating loads up to 6000kg and will compliment and provide options to their existing range.

Other benefits are anticipated from an ongoing review of both company's lighter duty product ranges where the combined interface of engineering expertise is expected to produce cost effective improvements to the products without compromising the quality reputations enjoyed by both companies.
